

Elegant and pure:
HOPPE mini roses

Purism in the details: HOPPE mini roses

The new mini roses show door handles in a completely new light. They are hardly noticeable when mounted on the door. As a result, the handle itself becomes more prominent, creating a whole new interplay between the handle and door design.

The interior door sets with mini roses are currently available in stainless steel and brass. A standard door set consists of a pair of door handles and the matching handle roses. Escutcheons, which are also available in a special version for bathroom doors, can be added if required.

The sets are all fitted with the patented **HOPPE Quick-Fit connection**, which enables the door handles to be assembled quickly and easily without any tools and ensures a firm fit. The key point of the proven technology is the blocking mechanism, developed by HOPPE, in the door handle receiver component. This holds the solid spindle of the other handle firmly and without play. Simply attach the mini roses and plug in the door handles – all done!

Naturally, HOPPE's interior door sets with mini roses also come with a 10-year operational guarantee.

Choose the right handle shape for you from our modern range and enjoy the pure design of door and handle.

Door preparation

Accurate door preparation is required since the size of the roses has been reduced to a minimum.

The hole for the handle must be 22 mm in diameter. A special drill or CNC machine is recommended for optimum results.

- Door preparation for HOPPE handle sets on mini-rose without escutcheons

- Door preparation for HOPPE handle sets on mini-rose with escutcheons

- Door preparation for HOPPE handle sets on mini-rose with emergency release and turn for bathroom/WC doors

Assembly

The handle roses are fastened to the door by putting the door handles together thanks to the **HOPPE Quick-Fit connection**.

The M846S escutcheons just need to be plugged together. To attach the MSK91/845S/OL45 bathroom/WC roses, plug the emergency release and turn together and fasten using a grub screw. In both cases, silicone helps to keep the escutcheons fixed to the door.
